

ISO 27001

Everything You Need to Know
About the 2022 Update

- All ISO standards are officially reviewed at least **once every five years** to remain current and reflect new and evolving security challenges.
- ISO 27001:2013 was the latest version. But in 2022, **the standard was updated**, adding a few new changes and controls.
- **Most updates are minor**, so you won't need to go through a major security program overhaul.

Important Updates for ISO 27001:2022

For the 2022 version, there's been a small change to ISO 27001 management system clauses which address clauses 4.4 and 8.1.

➔ Clause 4.4

Adds to the context of the organization, including the **requirement to identify necessary processes** and their interactions within your ISMS.

➔ Clause 8.1

Adds a requirement to **define process criteria**.

Important Updates for ISO 27001:2022

Annex A controls updates are moderate and have been derived from ISO 27002:2022.

- The former 14 families of Annex A are now focused on four themes:

- The biggest change has been the **addition of 11 new controls**, added to reflect new and evolving security areas.

11 Annex A New Controls

- Threat intelligence
- Information security for the use of cloud services
- Information and communications technology for business continuity
- Physical security monitoring
- Configuration management
- Information deletion
- Data masking
- Data leakage prevention
- Monitoring activities
- Web filtering
- Secure coding

Transitioning to ISO 27001:2022

When conforming to the newly updated ISO 27001:2022 standard, there's a three year transition period for all organizations. ISO 27001:2013 certificates will expire or be withdrawn no later than **October 31, 2025**.

- ➔ Start by **reviewing the standards** and updating your ISMS and statement of applicability to align with the revised requirements.
- ➔ Incorporate these changes into your **risk assessment and management review** so that key parties at your organization are on board with the changes.

Certification bodies will require you
to be ready to certify against the new standard
by April 30, 2023.

Why **BARR Advisory?**

30+ ISO 27001 Certifications Issued

25+ ISO Lead Auditors

1 of 9 firms in the U.S. eligible to perform both ISO/IEC 27001 and SOC 2 audits
