**[Company Name] Achieves Final Level 2 (C3PAO) CMMC Status**

[City, State]—[Date]—[Company Name] today announced that it has achieved CMMC Status of Final Level 2 (C3PAO), marking a significant milestone in the company's commitment to protecting sensitive government information and supporting customers across the Defense Industrial Base.

The status follows a successful CMMC Level 2 certification assessment conducted by an authorized or accredited CMMC Third-Party Assessment Organization. [Company Name] worked with BARR Advisory to prepare for the assessment, strengthen its cybersecurity program, and align its environment with CMMC Level 2 requirements.

"Achieving Final Level 2 CMMC Status reflects our commitment to protecting sensitive information and meeting the cybersecurity expectations of our customers and partners," said [Company Representative Name and Title]. "This milestone demonstrates the work our team has put into building a stronger, more resilient security program."

CMMC is the Department of War's cybersecurity assessment program for defense contractors and subcontractors that process, store, or transmit Federal Contract Information, or FCI, and Controlled Unclassified Information, or CUI. CMMC Level 2 is aligned with the 110 security requirements in NIST SP 800-171 Revision 2 and may require a C3PAO assessment depending on contract requirements.

As part of its CMMC journey, [Company Name] worked with BARR Advisory to evaluate its CMMC scope, identify and address readiness gaps, develop assessment-ready documentation and evidence, and prepare for the formal C3PAO assessment process.
