**[Company Name] Achieves Key Milestone Toward CMMC Certification**

[City, State]—[Date]—[Company Name] today announced that it has completed a CMMC readiness assessment to evaluate and enhance its alignment with the Cybersecurity Maturity Model Certification (CMMC) framework.

The assessment was supported by [BARR Advisory](#), a global cybersecurity consulting firm that has served hundreds of cloud-based and hybrid organizations aiming to build trust and resilience through cybersecurity compliance.

“Achieving this milestone helps solidify our unwavering commitment to protecting sensitive information and preparing for future certification,” said [Company Representative Name and Title]. “We hope this inspires confidence and assures our customers and partners that we take data security seriously.”

CMMC is the U.S. Department of War’s cybersecurity assessment program for defense contractors and subcontractors that process, store, or transmit Federal Contract Information, or FCI, and Controlled Unclassified Information, or CUI. CMMC Level 2 is aligned with the 110 security requirements in NIST SP 800-171 Revision 2 and may require a C3PAO assessment depending on contract requirements.

As a CMMC consulting firm, BARR Advisory worked closely with [Company Name] to evaluate its people, process, and technological service delivery requirements, and implemented a CMMC L2 Assessment-Ready environment that enabled safe and reliable service delivery in accordance with CMMC L2 requirements. This readiness support helps position [Company Name] for a future assessment conducted by a Certified Third-Party Assessor Organization (C3PAO) as part of the CMMC certification process.
